

# KOBRA SSD High Security Disintegrator

Throat width:  
**240 x 25 mm**

Shred size:  
**Sand-like texture particles**

Security level ISO/IEC 21964 (DIN 66399):  
**O-7 T-7 E-7**  
**Meets NSA/CSS Solid State Disintegrator (SSD) Specifications**

Shreddable materials:  
**Solid State Drives, Smartphones, Tablets, USB Pen Drives, Circuit Boards, Credit Cards, DVDs/CDs**

Waste bin capacity:  
**35 litres**

Voltage:  
**380-415 Volt / 50-60 Hz**

Power:  
**5,0 Kw**

Dimensions (WxDxH):  
**103 x 82 x 121 cm**

Net weight:  
**570 Kg**

Rated Capacity:  
**up to 40 Kg/hour**

## MAIN FEATURES

**Kobra SSD is a solid state drives/devices shredder** capable of destroying solid state drives, smartphones, memory sticks, iPads, USB memory devices, pen drives, tablets, circuit boards, credit cards and ID cards with embedded electronic chip and/or magnetic media, CDs/DVDs, flash memory IC chips, CPU chips with internal ROM and/or flash memory.  
**Shredded material is reduced to sand-like texture particles.**

**Kobra SSD has been approved by NSA and meet the requirements of NSA/CSS Specifications for Solid State Devices Destruction.** Kobra SSD is equipped with an integrated internal state-of-the-art **vacuum system** with an **HEPA air filtration system** to insure a clean, safe and comfortable operating environment. The air filtration system continuously transports air from different areas inside the machine including the feed port and filters the air through a HEPA filter to capture and contain any harmful materials used in the manufacturing of ICs. KOBRA SSD is supported by heavy duty **lockable**, double wheel casters for maximum mobility in the work area.

**Easy access 240x25 mm feed port** is designed with a safety brush covering the complete opening for safety and ease of feed operation. Lockable feed hopper cover prevents unauthorized access to the contents of the hopper once material is fed into the machine.

Features on the Kobra SSD include **electronic safety lock out and shut down monitoring systems** for bin access door, air filtration system access door and feed hopper, automatic reverse in case of accidental jam, two stage destruction operation with a large 7.5 inch diameter 16 blade grinders second stage for complete and reliable destruction, lighted indicator displays to keep the operator informed of machine's operating status, front mounted large lockable emergency stop switch for safety. **30x30 cm large, high output, exit screen.**

**Electronic monitoring system** continuously adjusts the operation of both stages for reliable synchronous operation. Standard **Hour Meter** helps the operator keep accurate maintenance records.

Please note the Kobra SSD is **designed specifically for solid state devices** PCBs, credit cards, DVDs and CDs. Shredding of other materials will damage the unit. Output may vary depending on size and density of devices and supply voltage. The Kobra SSD is the perfect device for solid state destruction applications backed by Kobra's over 30 years of experience in manufacturing of multi-media destruction equipment.

**EXCLUSIVE SHREDDING TECHNOLOGY**  
with two stages of destruction to pulverize solid state drives

Intuitive control panel with LED indicators

Easy access to cutting units and waste container

Easy removal and emptying of waste container
